The USB 3.1 standard introduces the new symmetrical/reversible Type C connector. The new connector is only slightly larger than the older mini and micro Type B connectors, which means that it can be used on mobile devices, replacing the existing use of mini or micro connectors. Also, unlike the earlier use of different connectors for the host (Type A) and peripheral (Type B) devices, the Type C connector is used at both ends. Best of all, the connector is symmetrical, which means no more fumbling around to figure out which side is supposed to be on top. Just grab either end and plug it in!

In addition to the new connector, the USB 3.1 standard increases the data transfer rate to 10GBps, which is fast enough to carry full HD video and multichannel, uncompressed audio. The standard also increases the power handling capabilities to 100 watts, which means that USB C will replace existing power, video, networking, and data cables. Apple is taking this to the extreme, with the latest MacBook Air featuring only a single USB C port for charging, video, and connecting peripheral devices. Also tested working correctly with the latest iPad and iPhone devices featuring USB C.

This 4 inch video adapter features a male Type C connector on one end and a female HDMI connector on the other end.

- Cable Length Approx 4 inches
- Cable Gauge 30AWG
- USB Standard USB 3.1
- HDMI Standard HDMI 1.4B
- Maximum Resolution Up to Ultra High Definition 4Kx2K @ 30Hz
- Type USB 3.1 Type C male to HDMI 1.4B female
- Power Rating Passive
- Compatibility Mac OS X, Chrome OS, iOS, Windows
