Perfect solution when you do NOT want to attached a physical DVI cable and monitor to a computer, but your operating system or computer BIOS tests the DVI-D port to see if a monitor is attached. This dummy plug has a built-in circuit which will fool the OS into thinking a 1920x1080@60Hz is attached. This plug does NOT provide for any sort of video image!

Features and Specifications:

- Works with Windows, OSX, Linux and just about everything else Ultra-compact, low profile
- Supports Plug and Play, Hot Plug
