Product Details:

Ideal for any home theater or security system installation, these brackets accept any single or dual gang size wall plates. May be used for any Class 2 low voltage wiring application that does not require an electrical box. This products has speed clips which allow easy mounting to existing wall board (drywall) cut-out. Open back design allows increased clearance, easing use with multiple conductor, HDMI, component, coaxial, and other cables.

- Non-conductive, smooth plastic construction.
- For communications, cable TV, computer wiring.
- Adjusts to fit 1/4" to 1" thick wallboard, paneling, or drywall.
- Bracket is its own template for cut out.
- Better than metal and costs less too!
- Specially designed wing flips up when mounting screw is tightened for a secure mount.

NOT INTENDED FOR USE WITH standard voltage wires (ie 110volts)! Due to smaller resulting opening, this product not recommended for use with PASS-THRU wallplates
