This IR signal wireless extender includes the IR transmitter unit and the IR receiver unit, and is designed to get your remote control's signal to the device that needs to receive it without the messy wires normally used. Since the IR signals need line-of-sight to work, you will need this extender if the equipment you are trying to control is NOT in sight.

Features and Specifications:

- Wire IR frequency support 20 to 60Khz
- Low power consumption
- Portable design size
- Sturdy metal case design
- Long wireless distance is up to 200M/650ft (distance may vary with obstacles)
- Included: 1 IR Transmitter and 1 IR Receiver, 2 USB Cables (for power supply), 1 IR Blaster Extension Cable, 1 IR receiver extension cable, 1 manual
- 2 USB Power Blocks REQUIRED (not included)
