The USB A to MINI-B 4pin cables are used by many cameras, GPS systems, and some older cellphones that use the MINI 4pin connector type.

When comparing our cables to our competitors, please note the WIRE THICKNESS of **28AWG (1P) + 24AWG*2C**. Most of our competitors use **28/28AWG** cables resulting in signal loss, slower charging times, and overall amperage loss.
