USB A Male to Micro USB 5 pin Male Cable, Black. This **REVERSIBLE** USB A to **REVERSIBLE** Micro USB B 5pin Cable provides one USB A Male connector, and one Micro USB B connector to create a simple way to connect mobile devices to a USB capable computer for every day tasks such as data synchronization and file transfers. Never again will you have to fumble to figure out if your MICRO-B or USB TYPE-A connector ends are properly oriented for the device, computer, or charging block!

This cables is the most common USB cable used to charge and transfer data for many SMART-PHONES using the Android and Windows operating system.

When comparing our cables to our competitors, please note the WIRE THICKNESS of **28AWG (1P) + 24AWG*2C**. Most of our competitors use **28/28AWG** cables resulting in signal loss, slower charging times, and overall amperage loss. Both the USB Type-A connector AND the USB Micro-B connector are fully "reversible", meaning that you no longer have to connect this cable with the standard orientation, allowing for much quicker insertion (especially on the Micro-B connector end)
