

UHF - VHF Antenna Combiner

Description

Mast Mount UHF/VHF Antenna Combiner weatherproof coupler is designed to mount directly to the antenna mast pipe and combine signals from separate VHF and UHF antennas. Switchable DC pass through is provided from output to UHF input, allowing a remotely powered signal amplifier to be used with the UHF antenna.

Features

- Fully weatherproof housing
- "F" type 75Ω inputs and outputs
- UHF input: 470 ~ 862MHz
- VHF input: 47 ~ 230MHz (also fully suitable for broadcast FM reception)
- Insertion loss: 1.5dB
- DC pass through capacity: 12V DC, 100mA max
- Dimensions: 4" x 4" x 1"

Part Number Table

Description	Part Number
UHF - VHF Antenna Combiner	33-2230
